## The P.U.R.E.™ System

### Precision UnResolved-materials Extraction™

P.U.R.E. is a unique molecular cleaning method developed by Aaren Scientific to remove materials and extraneous processing materials found in hydrophilic lenses that are not fully polymerized. Aaren lenses that go through the P.U.R.E. system have enduring optical clarity and enhanced biocompatibility. All Aaren hydrophilic acrylic lenses are currently being treated with this proprietary system.
